

PLYWOOD SIDE RAILS

Side rails are the pieces that hold the slats to the bed structures. They hold the frame to give stability to the set. For fixed and storage-beds they are usually the longest pieces, but for adjustable beds the side rails will be composed of several smaller pieces, which allow a smooth movement of the engine.

WOODEN SIDE RAILS

- **Type of wood:**
Beech, pine, poplar, MDF or others
- **Surfaces:**
Natural, 4 sanded faces
- **Wrapping:**
